

## New digital keyboard from 360 Systems with *real* acoustic instrument sounds.

Introducing a keyboard that doesn't synthesize its sounds — it duplicates real ones. Imagine strings with the rich sound that only the best acoustic instruments have. Now you can have them, and almost any other sound you can think of. We've recorded a whole catalog of instruments in the studio and stored them on digital memory chips. They're as real as the master tapes they're made from. Now you can cut your album, score your film, or perform live with some of the world's most impressive sounds.

The 360 Digital Keyboard is eight voice polyphonic, and holds up to thirty-two instruments. You can even play two instruments at once — two under each key, or divided by a player-selected split point. We've included vibrato and pitch bend wheels, filtering, and an expression pedal so your performance can really come alive.

Start out with Saxophone, Flute, French Horn, Violins, Viola, Cello, Trombone,

Trumpet, Piccolo Trumpet, Oboe, English Horn, Bass, Clavinet, Nylon String Guitar, plus everybody's favorite electric piano. Add more from our growing library at any time.

The sound of the 360 Digital Keyboard is unlike any other because we use full-length notes (some are eight seconds long) with no looping, no audible transpositions and no synthesized envelopes. L.A.'s top session players are called for our sessions, and we engineer their performances under tightly controlled studio conditions. But judge the sound yourself. Write for a free brochure, demo record and the name of your nearest dealer.
