

Brighten your sound with the finest strings and brass.

If you've ever wanted to add truly authentic strings and brass to your sound, the time has come.

From now through December 31, your authorized Crumar dealer will give you, absolutely FREE, our new Keyboard Seat, when you purchase our Performer String & Brass Keyboard. That's over a \$75 retail value, absolutely FREE.

Now, we don't expect getting this exceptional seat is the only reason you need to buy a Performer. On the contrary, we're using it as a reason for you to try the Performer. We know once you play it, you'll buy it.

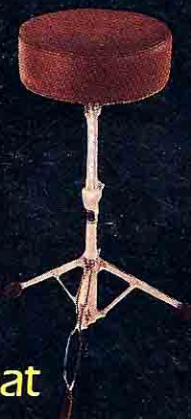

For instance, you'll experience the lushest, truest string sounds on the market, 8 & 16 foot voices you can overlap in any proportion you choose. Then, try the brass, and hear how our new Active Filter delivers all the dynamics and tonal colorings you'd expect from a real life horn section. The Performer's features also provide you with an on board EQ, variable crescendo, vibrato delay, 2 1/2 tunable octave range and trouble free LED switching.

All this, plus our FREE Keyboard Seat that's perfect for any setup you utilize.

Convinced? If not, consider this final point. More and more of today's music incorporates string and brass sounds. That means the Performer can produce gigs. And, with the Performer's very affordable price, that means it pays for itself.

So, visit your Crumar dealer before December 31, and see how buying a Performer can leave you sitting pretty. Call us for the name of your nearest dealer.

Made by North Hardware, our Free Keyboard Seat (a \$75 value) is ideal for any keyboard setup you have. Completely height adjustable, the seat features a double leg, tripod base for maximum support, plus non-skid rubber feet. The heavily padded seat cushion makes playing those long gigs a breeze, and the entire unit breaks down for easy transportation.

FREE Keyboard Seat
