

ONE OF THE MOST POPULAR ARP SYNTHESIZERS ON RECORD IS NOW THE FASTEST.

Sound is why you buy a synthesizer.

Speed is what you need to play a synthesizer "live."

That's why ARP has taken the famous sound of the Pro Soloist and added controls that make it not only the best sounding synthesizer in music, but also the fastest synthesizer around.

Incredible sound is the main reason why the Pro has appeared on so many recordings and concert stages around the world. The Pro's realistic preset voices and expressive touch-sensitive keyboard are important to musicians like Tony Banks, Billy Preston, Deodato and other performing artists.

The new Pro has push-button digital switching (DGX) that lets you change sounds as fast as you can play the keyboard. Each preset voice has its own LED status light to let you know where you're at. New color-coded panel graphics help you locate your next musical stop.

That's not all. In addition to the thirty preset sounds on the Pro/DGX, the touch-sensor controls to the left of the keyboard let you add musical expression and expand your sound range. Simply by adding extra pressure to the keys, you have total control over brilliance, wow, growl, vibrato and other musical effects. A portamento foot switch lets you add synthesizer glide without using your hands.

Inside and out, the new Pro/DGX carries on ARP's reputation for reliability, musical integrity, and speed in live performance. Give a listen to the records. Then see your ARP dealer for an ear-opening demonstration.

World's leading manufacturer of electronic music synthesizers.
