

ALLOW US TO DEMONSTRATE THE WORLD'S FIRST SYMPHONIC KEYBOARD. THE ARP OMNI.

On this five-minute demonstration record, you will hear some of the sounds you can create on the new ARP Omni. The world's first symphonic electronic keyboard. Listen to the realism. The Omni is not just polyphonic but symphonic, able to produce authentic strings, brass, piano, harpsichord and vibes plus several different instrumental sounds *at the same time*.

The Omni is an orchestra, a synthesizer and a variable keyboard. You get true-to-life symphonic voices and incredible synthesizer sounds that unleash tremendous musical power. Special features like stereo separation, a sustain foot switch and filter pedal, chorus phasers and waveform enhancement add to the Omni's big sound.

Listen to the strings.

The Omni was designed with special attention to the voicing of string sounds. An exclusive ARP process called *asynchronous phase modulation* creates rich, full and silky-smooth strings. Clean and crisp highs. Full and

resonant lows. In a recording studio or on stage, the Omni is virtually impossible to distinguish from real strings.

Brass with class.

The Omni can produce a full range of fat brass sounds, from a big band chorus to mellow, Chicago-style horns.

Keyboard omnipotence.

The Omni is an ultra-versatile keyboard. It can change from acoustic to electric piano, from harpsichord to pipe organ to synthesizer. All in just seconds.

And it is a superb performance instrument. The panel gives you instant access to every control. LED status indicators display functions in use. Horizontal sliders and computer-grade switches add flexibility and speed to live performance. And the sound combinations are yours to explore.

First play the record, then play the Omni.

You have to hear the Omni to believe the Omni. So listen to the record again. Your ears will tell you that the Omni is a unique musical instrument with tremendous range and expression.

Then, play the Omni at your ARP dealer. Your musical sense will tell you that the Omni is a perfect blend of advanced technology and "human engineering" concepts.

ARP Omni. The world's first symphonic electronic keyboard. All you have to do is listen to believe.

If the record has been removed and you would like a copy, send \$1.00 for postage and handling and we will send a package of information on the Omni and the complete ARP synthesizer line. Write to: Omni Demo, ARP Instruments, 320 Needham Street, Newton, Mass. 02164. Allow 2-3 weeks for delivery.

NOTE: For best results, place a 12" LP underneath the soundsheet for a firm playing surface.
