

Billy Preston's SPACE RACE BLASTS OFF WITH ARP

Billy Preston's Space Race is a blast! And there seems to be no limit to the dimensions of his musical creativity.

Space Race, like many of this year's million-sellers, features an ARP electronic music synthesizer. Billy began his Space Race with his ARP Pro-Soloist. Got warmed up with its trumpet and wow tabs.

And ended up with some wild sounds. The Pro-Soloist has a lot to offer a star like Billy Preston. A touch sensitive keyboard, a seven octave range, thirty preset voices, and much more.

Let Billy Preston send you on an incredible musical odyssey with ARP. Keep on blasting, Billy!

World's leading manufacturer of electronic music synthesizers.
