Bass
Piano
Banjo
Harpsichord
Vibes

VARIABLE EXPRESSION CONTROLS

1. *Portamento Speed*—lets you 'slide' from note to note.
2. *Vibrato/Repeat Speed*.
3. *Transpose*—extends the range of your Soloist keyboard to five octaves. Lets you go up or down one extra octave instantly.
4. *Brilliance*—Make each voice as bright or as muted as you wish.
5. *Volume*—Achieve perfect volume balance with organ or other instruments.

TOUCH SENSOR EFFECTS

It's a real touch sensitive keyboard that responds naturally to your finger pressure. The harder you press on a key, the more of these effects you can create.

1. *Pitch Bend*—Touch the note and make the sound wail.
2. *Vibrato*—Add vibrato just where it's needed. Sound like a great pro.
3. *Wow*—The classic "synthesizer" sound.
4. *Growl*—Make any Soloist voice really grrrrrowl, just by pressing a little harder.
5. *Brilliance*—gives any note extra brightness.
6. *Volume*—gives you touch-control of dynamics.
7. *Repeat Switch*

ON BACK OF SOLOIST:

The Soloist connects to your organ, amp, or Leslie.

Tuning Control—Tune the Soloist easily to any other musical instrument.

Touch Sensitivity Control—Adjust for heavy or light keyboard touch.

DIMENSIONS: 34" x 10" x 4"

WEIGHT: 24 lbs.

SOLOIST comes complete with Owner's Guide, 'Soloist Solos' Songbook, connecting cables, and superb warranty.
