

SOUND~A~ROUND

QUAD PANNER MODEL **QP-1**

The SOUND-A-ROUND can turn your quad system into a dynamic, moving sound environment.

From a sublimely slow shift of sound from channel to channel to a neck wrenching spin, you can precisely control the speed of revolution with either the panel control or optional foot pedal

From barely perceptible changes in loudness to a blatant jumping effect from channel to channel, the depth can be controlled with either the panel control or optional foot pedal

The direction of revolution can be instantly reversed with a switch.

Four LEDs let you know what the SOUND-A-ROUND is doing for you—indicating speed, direction, and channel levels.

A joystick control allows you to precisely maneuver the sound by hand if you prefer.

The SOUND-A-ROUND is available in the standard one input to four output configuration and also in two and four input versions.

All this unique and stunning capability for only \$299.95. Ask your dealer for more information or write to:
