

A lot of music for a little cash.

The beautiful sound of 14 different instruments
in one keyboard—at a beautiful price.

Wow! An electronic keyboard that makes beautiful music. A sound that's professional enough to take on stage. And inexpensive enough to play at home.

Listen. Electric piano. Organ. Harpsichord. Best of all, an acoustic piano sound you'd think came from a baby grand. Wind instruments? Of course. The flute and the oboe. Strings? Cello and violin. In fact, it has 12 natural instrument sounds that are as clear and true as the instruments themselves. And if you're funky, there are even two synthesizer sounds.

There's also a fine pitch control adjustment, and each sound has its own LED indicator. So if you play by candlelight, you can see any sound you play at a glance.

The Casiotone 301 has a rhythm section, too. With 8 basic rhythms, plus variation—a tempo control—as much allegro or lento as you like. There's even an optional sustaining pedal, and a self-contained amplifier. And if you're into louder sound—real fortissimo—there's an output jack for external amp/speaker.

Of course, you really should hear it for yourself. And you can. At any Casio dealer.

You won't believe your ears. Or the price.

AT CASIO[®], MIRACLES NEVER CEASE.
