

Casio lets you get your act together one step at a time.

The new Casio System 8000 is the first pro-quality keyboard that isn't prohibitively expensive.

Step-by-step, starting with **1** a polyphonic keyboard, you can add **2** an auto-accompaniment unit, **3** another keyboard, **4** a memory unit, **5** a pedal keyboard, **6** sustain pedals, **7** a foot volume control, **8** two speakers with built-in reverb, and **9** a stand with built-in mixer.

This gives System 8000 the flexibility to be tailored to any

musician's act, with performance enough to satisfy the most demanding performer.

Its 49 key, 49 voice stereo keyboards have a layering feature, so that one keyboard can drive the other, giving symphony-like sound. And among its many other abilities, System 8000 has built-in sustain, reverb, vibrato and chorus, as well as a RAM memory unit that's like having a spare pair of hands providing an additional track of sound.

System 8000 won't be upstaged by even the very best quality professional instruments. And it's priced a lot better—even if you buy it together as one unit.

Whatever your act is, no other pro-quality keyboard will let you get it together for less.
