# Make Music a Part of Your Life!

Make all your musical dreams realities with 61 full-size keys, dynamic hi-fi stereo sounds and an incredible selection of 210 different Tone Bank sounds.

**TONE BANK**  
KEYBOARD

CT-625

**With 61 full-size keys and high-fidelity stereo speakers, Casio's new CT-625 is definitely not short on powerful music performance! And to accent your musical skills, there's 210 different Tone Bank sounds and 20 PCM auto-rhythms to choose from, plus Casio's innovative Casio Chord auto-accompaniment functions.**

### **Tone Bank Function With 210 Different Sounds!**

Casio's incredible "CD" Casio Dynamic sound source gives you fingertip selection of an outstanding array of 210 crystal-clear keyboard sounds. This selection is made possible by Casio's innovative "Tone Bank" function, which actually "integrates" the sonic elements which make up the CT-625's preset sounds, to create this seemingly endless selection of unique new sounds! And for easy sound selection, the names of all 210 sounds are listed right on the CT-625's front control panel.

### **20 Rockin' and Reelin' PCM Rhythm Patterns**

From heart-pounding rock'n'roll and disco, to lazy waltz and even the head-bobbin' rhythm of reggae, the CT-625's hard-drivin' PCM auto-rhythms turn all your melodies into full-scale, danceable performances. There's 20 different patterns to choose from, and the CT-625 gives fingertip control of the rhythm tempo, so you can match the auto-rhythms perfectly to the piece you're performing.

### **Solo Performance Fun with Keyboard Percussion Sounds!**

The CT-625 is equipped with two special tone selectors that

let you unleash your musical "solo" talents. Select the "Percussion" tone and the entire keyboard suddenly gives you "finger-tapin'" control of 49 different percussion sounds—just tap on the keys to play booming bass drums, snappy snares, cow bells and more. And a special "Dual Bass" tone lets you play two different bass sounds at the same time!

### **Three-Way Auto Accompaniment with Casio Chord**

The CT-625 features three different auto-accompaniment modes, which add full chords, bass lines and even accent notes! You can choose from the "Single Finger" (Casio Chord) mode for one-finger play, the Fingered 1 mode to play chords manually, or the Fingered 2 mode. In the Fingered 2 mode, notes can be added to the auto-play accompaniment manually without affecting the auto-accompaniment pattern.

### **Demo Tune Highlights CT-625 Performance**

With just a touch of the "Demo Tune" button, the CT-625 automatically plays back a beautiful pre-programmed tune that showcases a wide array of CT-625 features, functions and sounds. The demo tune also makes great background music.
