

This is Syntha-Sound by Baldwin

Syntha-Sound is the first true tone synthesizer that's an integral part of a standard two-manual organ... the first synthesizer that you can combine with organ voices on the same keyboard. Syntha-Sound is really three units in one:

- A modern synthesizer "Spectrum Shaper" section with many variable controls.
- A flute synthesizer section with pre-set voices which may also be varied with the Spectrum Shaper controls.
- Four exceptionally realistic pre-set orchestral voices.

Syntha-Sound is an instrument that speaks for itself. To hear what it has to say, visit your nearest Baldwin dealer and get acquainted. Or write for more information to Baldwin, Box 2525, Dept. DB-102, Cincinnati, Ohio 45201
