

## The Pentaphonic Clear

A powerful synthesizer, yet so compact it doubles as a dynamite remote! The Clear is a new concept in live-performance keyboards, combining stageworthy sound and looks. Take the spotlight with all these features on your side:

**5 voices** for true polyphonic capability. Each voice has its own VCA, VCF and two ADSRs. The Clear delivers massive timbre without effect boxes.

**3 oscillators** per voice, 8 waveshapes per oscillator, and computer-tuned chorusing. The brilliant new sound of the Clear is unmistakable.

**100 programmable presets.** Fast access and editing of your favorite sounds for the versatility a performer needs.

**Polyphonic sequencer** stores 600 notes in true tempo. Enables you to play your lead line over the sequence. Separate gain control for proper sequencer/keyboard mix.

**Chromatic transposer** shifts both the keyboard and sequencer to any key you need. Instantly.

**Remote capability.** Separate power supply for reduced weight, increased mobility. Complete with 20 foot extension cable and leather shoulder strap, the Clear gets you into the onstage action.

**Clear enclosure** and controls look great and take full advantage of today's spectacular stage lighting effects. The Clear was made to be seen, not just heard.

The Pentaphonic Clear. Enormous sound wrapped in futuristic styling. If your work takes you out of the shadows and into the spotlight, take along the keyboard that was born for the job.

Hear the Clear at selected dealerships  
or send \$2.00 for a demo cassette.
