

ELKA

Today's music is quite sophisticated, and the musician of today needs a keyboard instrument that will let him create many new and exciting sound combinations that before took several musicians. Elka String Choir is capable of creating a true piano reproduction as well as the synthesized orchestral sounds of Violin-Cello, Strings, and Clavichord with individual volume controls to color each instrument's voicing. The keyboard has 25 bass and 36 treble keys that can be divided to allow for balancing of the treble and bass response and will produce the following musical options:

- Piano on the bass keys and Violin-Cello on the treble keys
 - Violin-Cello only on the entire keyboard
 - Strings only on the entire keyboard
- Combined effects of Violin-Cello and Strings will produce a full-bodied String section
 - 61-note Piano
- Clavichord can be produced in place of or in combination with Piano, Violin-Cello, or Strings

THIS PORTABLE KEYBOARD INSTRUMENT WAS DESIGNED WITH THE MUSIC OF TODAY IN MIND, AND THEY ARE PRICED SO A MUSICIAN CAN AFFORD THEM.
