

# THIS IS EXACTLY WHAT OUR NEW STEREO SAMPLED PIANO SOUNDS LIKE.

With your eyes closed, E-mu's Proformance™ does something remarkable. It turns into an \$18,000 grand piano.

Open your eyes, and it's our new 16-bit stereo sampled piano module again. One that offers the best sampled piano sound money can buy. Of course, with a price of only \$499, you won't need a king's ransom to buy one.

The key to Proformance's startling realism lies in our true stereo piano samples. Not simply mono samples panned left and right, Proformance contains actual stereo recordings, precisely capturing the experience of sitting at the keyboard of a fine concert grand. All the sonic complexity and rich spatial resonance that defines a piano's sound. Characteristics which can *only* be reproduced with true stereo sampling.

Since music comes in a variety of styles, Proformance gives you a variety of piano sounds. Choose from a classic grand, a rock piano that cuts through the hottest mix, a honky tonk piano, and much more. Our Proformance Plus™ even adds electric pianos, organs, vibes, and acoustic and electric basses.

And since Proformance uses our amazing G chip, you can be sure each sound is reproduced with the unsurpassed audio quality E-mu is famous for.

But, as they say, hearing is believing. Play a grand piano. Then play Proformance at your E-mu dealer.

You'll hear the same thing. Exactly.
