Positive Feedback

Dee Farr, studio and professional keyboardist, talks about KAWAI.

"I've been on the music scene, professionally, for many years, and I've come to rely on KAWAI synthesizers for much of my work. As a professional musician I expect my instruments to be the very best...both in quality and sound performance. I don't expect feedback unless I ask for it, and KAWAI always delivers Positive Feedback."
