

PERFORMANCE PLUS

Kawai's exciting new SX-240 is everything you need in a professional synthesizer. The SX-240 is **8 voice polyphonic** (not 6) with **2 oscillators per note** for that big, fat, rich sound. The SX-240 is the **ONLY** keyboard in its price range that features a **split keyboard** (2-6, 4-4, 6-2 assignable polyphonicity) and an 8-bank 1500 note **real time polyphonic sequencer** (with clock input for drum machines).

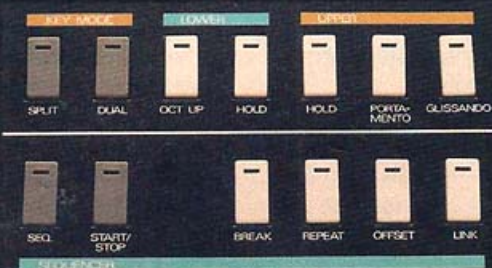

The SX-240 also boasts a user friendly programming system featuring an **LED alpha-numeric readout** that gives you **exact** information about how your machine is programmed (no "mystery"

patches here). Kawai's unique **cursor control system** makes programming and editing your patches simpler than ever before. The SX-240 also features **MIDI-IN, OUT** and **THRU**, and will function on all sixteen MIDI channels.

Select Kawai MI Dealerships are available in some areas. For further information contact: MI Department, Kawai America Corp. You'll be truly amazed at how affordable and profitable

Kawai technology can be!
