

# INTRODUCING

## Performing Synthesizer

KORG  $\Sigma$  (Sigma) is a completely new type of electronic music synthesizer. In Greek, "Sigma" stands for "summation". And that's just what KORG has done with their new synthesizer. Features essential for performance are combined with the flexibility needed for studio applications in this sleek new instrument.

Exciting innovations enable you to easily achieve dazzling synthesizer effects you'd never have dared try before. In summation, KORG Sigma combines in one instrument everything you've ever wanted in a synthesizer.

Be on the watch for further announcements. KORG  $\Sigma$  will soon be made available in your area.
