- 2—Fine pitch control

Outputs

- 1—Hi level
- 1—Lo level
- 1—Isolated phased output
- 1—Expression pedal output jack
- Detachable music rack

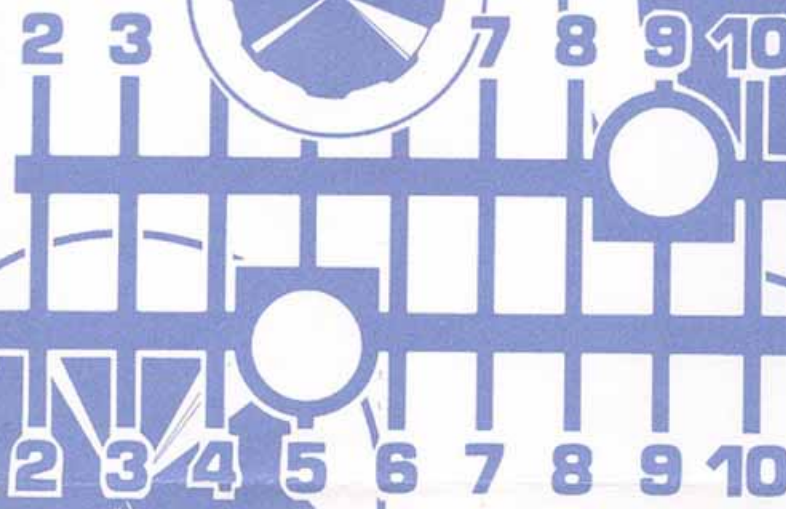

KORG

After much experimentation and research, a totally unique standard in string generations has been achieved in the Polyphonic Ensemble-S. The uncompromising quality of sound makes the most demanding musicians take notice of its completely polyphonic orchestrations. It provides two chorus presets, two pipe organ presets and two brass presets. These characteristics can be contoured with bass and treble controls. The overall attack and sustain of the instrument are controllable as well. The master phazing control adds to the dynamism and realism of this product. The Polyphonic Ensemble-S is a must!

The Polyphonic Ensemble—P is a new breed of keyboard. With individual tuning for each note, a natural and colorful expressiveness is achieved. Its intricate electronic design provides a kaleidoscope of piano qualities plus an independent synthesized section that scans polyphonic generations from brass variations to flute textures. If you're looking for a whole new spectrum of sound and versatility within one keyboard, investigate the Polyphonic Ensemble—P.

Specifications

60 note keyboard with gold plated, dual contact structure. Individual note tuning behind metallic strip under keyboard.

Traveler System—Hi pass/Lo pass filter network

- 1—rotary control—low order harmonics
- 1—rotary control—high order harmonics
- 1—rotary control—overall tonal qualities
- 1—rotary control—voltage controlled filter
