# GIVE ME ADRENALINN!

## Groove Filter FX

AdrenaLinn's beat-synched effects are what truly set it apart from anything else out there. AdrenaLinn delivers its unique and dynamic sound by altering your guitar tone rhythmically and in-synch to an internal drum machine or to MIDI. Play a tremolo that pulses perfectly every 16th note, a flanger that cycles exactly every 4 bars, or a rotary speaker that spins in synch to your beat. Better yet, twist your guitar sound into a looped pattern of filtered tones with AdrenaLinn's filter sequencer—choose one of the factory filter grooves or create one to fit your song. Then add AdrenaLinn's tempo-synched delay and auto-panning for the final touch.

## Amp Modeling

AdrenaLinn also comes with twelve killer amp simulations that will satisfy the ears of the most finicky players. From Fender to Marshall, Boogie to Vox and more, AdrenaLinn does justice to all the new and classic amps. Then sweeten up your sound with AdrenaLinn's filters—it's like sending your amp through a console EQ!

## Classic and New Effects

AdrenaLinn gives you loads of classic filter and modulation effects like envelope wah, auto-wah with variable attack and decay, volume swells, and talk box. But with AdrenaLinn's powerful sound design system, you can create your own galaxy of star-quality effects that will have you staying up nights. How about an envelope flanger or a filter tremolo? Or use a MIDI keyboard to alter your filter frequency. Or create a guitar arpeggiator by modulating the flanger with the sequencer.

The sky's the limit.

## Internal Drum Box

What would a Roger Linn product be without a rhythm machine? AdrenaLinn comes with a fully-programmable, 2-bar looping drum machine. With over 40 drum sounds to choose from, you can create your own drum grooves at the touch of a few buttons. Send them through the filter effects for some of the coolest processed beats you've ever heard!

## Get One Today!

At \$395 US list, how can you live without it? Visit [rogerlinndesign.com](http://rogerlinndesign.com) for a video demo, audio samples, and to find out where to get your AdrenaLinn today.
