

# Price and Performance Breakthrough! New \$499<sup>95</sup> Realistic<sup>®</sup> Synthesizer by Moog Music\*!

Elton John  
With the Realistic<sup>®</sup>  
MG-1 Synthesizer

## The Ultimate Musical Instrument!

Now you can have a universe of exciting sound at your fingertips... at a price that's very down to earth. Radio Shack introduces a professional synthesizer with true *polyphonic* capability, which means it can play chords like an organ, even sound like an organ. Yet our MG-1 is a sensational "lead" player, too. Dual independent tone sources, with almost infinitely variable wave shapes, give it a "fat" sound so you can produce the dynamics of today's high-energy music, the compositions of the old masters—plus sound effects like wind, UFOs and more. The only limit is your own imagination!

## A Symphony Orchestra... a la carte!

Versatile color-coded controls let you recreate the sounds of different instruments—everything from piccolo to tuba. You can play it through your stereo system, a musical instrument amplifier, or plug in headphones for practice and private listening. We include an easy-to-read, illustrated manual that will have you "synthesizing" like a pro in no time—even if the only thing you play now is a radio. The MG-1 is U.L. listed, of course, and backed by our 1-Year Parts and Labor Limited Warranty.\*\* Available *only* at The Shack<sup>®</sup>. Come in for the exciting details and a hands-on "test drive" today!
