

Treat Yourself to FREEDOM*

Tom Schuman
from SPYRO GYRA

The LIBERATION by MOOG® gives you the freedom to move out in front! Sing, rap, entertain... step out into the action with the synthesizer that's no heavier than a Les Paul® guitar!

Freedom to express your innermost musicianship with the famous MOOG ribbon, modulation, filter and loudness controls comfortably under your left-hand while you add additional nuances on the touch-sensitive keyboard.

Freedom to choose from:

A powerful lead-line synthesizer with two audio oscillators, full-modulation effects, noise-generator and sample-and-hold...

OR a totally separate output section for unique bell-like ring modulator sounds...

OR a completely polyphonic keyboard instrument with its tone color determined by the patented MOOG filter...

OR an external synthesizer interface that enables you to play another instrument from your LIBERATION...

OR all of these in any amounts through an incredible final output mix where the synthesizer voice always appears as a lead line over the polyphony.

Finally the freedom to own your LIBERATION because it's available at an unbelievably affordable price.

(We're the people who started it all!)
