

The Moog logo is centered at the top of the advertisement. It features the word "moog" in a lowercase, rounded, sans-serif font. The letters are white with a thick, multi-colored border that transitions from purple to pink to yellow. The logo is set against a background of a yellow grid pattern that recedes into the distance, creating a sense of depth.

# moog

## VERSATILITY AND VALUE.

Full polyphony in a 49-note keyboard; string, organ, and brass voices; and a new low price: that's what you get with Opus 3.

But that's not all. A unique articulator circuit lets you layer sounds in a way no other keyboard can, and a stereo mixer lets you put the sound of Moog® wherever you want it. If that's not enough, Opus 3 lets you modify the main sounds through an adjustable chorus circuit and the patented Moog filter.

As for the price, you can thank Moog engineering. Our innovative in-house design and manufacturing skills give us a price advantage no other polyphonic keyboard can touch. Opus 3, from Moog.

*The people who started it all.*
