

## Two From Oberheim

The Dual Manual Eight Voice Polyphonic Synthesizer with Programmer consists of eight Synthesizer Expander Modules under the control of dual manuals, keyboard controllers, and an eight voice polyphonic programmer. The top keyboard has a four voice capability while the lower keyboard can use all eight voices. The lower keyboard acts as a master for pitch bend and filter control. In mode four, four voices will be controlled by each keyboard; in mode six, two voices appear on the upper keyboard and six on the lower; in mode eight, all voices are controlled by the lower manual. Also included are CV IN and CV OUT for all eight modules. Suggested list price is \$12,500.

The new OB-X is a fully programmable four, six, or eight voice polyphonic synthesizer with 32 program memory storage plus direct to tape cassette storage for building a library of patches. The OB-X is microprocessor controlled to provide the ultimate in versatility while maintaining a portable package. Features include a five octave keyboard, auto tune, edit mode, polyphonic portamento, polyphonic sample and hold, noise generator, dual modulation levers, ADSR envelope generators, and two oscillators per voice. Foot pedal control inputs are provided for vibrato, volume, and filter; plus sustain and program advance foot switches. The factory offers a "roadie kit" to facilitate quick and easy field repairs. The construction techniques employed ensure high reliability and serviceability. Retail prices are \$4295 for the four voice, \$4995 for the six voice, and \$5495 for the eight voice.

For information on any of the above units, write directly to Oberheim Electronics, 1455 19th St., Santa Monica, CA 90404, or call 213-829-6831.
