

THE OBERHEIM SYNTHESIZER PERFORMANCE SYSTEM consists of either the Oberheim OB-Xa or the OB-SX Polyphonic Synthesizer, plus the DSX Digital Polyphonic Sequencer and the DMX Programmable Digital Drum Machine. You can record notes, patches and drum beats, then play them on stage or in the studio in a dazzling performance that would take a dozen musicians or a dozen tracks to pull off conventionally. THE OBERHEIM SYNTHESIZER PERFORMANCE SYSTEM makes getting your ideas down faster and easier than ever before.

Program the multi-track DSX directly from the Synthesizer keyboard—record different sections and then Merge them together to make the song as long as you want. The DSX can store up to 6000 notes plus patch changes, splits, tempos and transpositions in any of 10 different sequences; each with 10 tracks. In addition to driving all of the voices in the Synthesizer, the DSX also has eight external CV and Gate outputs, which can be used with other synthesizers for up to sixteen voice polyphony.

The DSX also syncs up with the DMX for sound you wouldn't believe could come out of a box. Program your drum beats, combine the individual parts into a complete song, then let the whole SYSTEM loose with the touch of a single button! THE SYSTEM has cassette interface and battery backup too, so you don't lose your recordings when you lose power.

The Oberheim Performance System: products that work together to expand your creativity as never before.

- The OB-Xa Polyphonic Synthesizer**
4, 6 or 8 Voice Synthesizer
120 Patch Programs
5 Octave Programmable Split/Double Keyboard
Stereo/Mono Outputs
