

the **CAT**

NO MATTER WHERE YOU PERFORM

As a keyboard player you want all the features available on the high priced synthesizers but without the high price. The CAT synthesizer (at only \$599.00 list) offers you features found on synthesizers costing up to \$1700.00 list. We also offer you features NOT FOUND on much more expensive units. Now, no matter where you perform, the dynamic versatility of a performance synthesizer is available to you and for only \$599.00 list.

If you're wondering what we could possibly offer you for \$599.00 list, read on: 37 note keyboard, 2 oscillators, (waveforms on oscillator 1 - sawtooth, triangle, modulated pulse, sub-octave square, ALL SIMULTANEOUSLY MIXABLE. (Not available on many more expensive synthesizers). Waveforms on oscillator 2 - square, sawtooth, sub-octave square, ALL SIMULTANEOUSLY MIXABLE. (Not available on many more expensive synthesizers). An ADSR with repeat plus an AR generator. An automatic sample and hold whose output can be

patched to VCO 1, VCO 2, or the VCF. A-24dB/octave voltage-controlled low pass filter with adjustable Q that can be used as a sine wave oscillator. A VCA that can be modulated by the ADSR, AR or can be bypassed. An LFO with a rate of .2Hz to 20Hz. The Cat can also be easily connected in series with a simple stereo cable. (Not available on many more expensive synthesizers). Plus much, much more.

We don't want you to take our word, we want YOU to convince yourself by going to your dealer and playing the CAT, then comparing it, feature for feature, with any synthesizer (that's right, we said ANY synthesizer) under \$1700.00 list in the store.

We feel you'll put your hard earned money on our CAT. So, next time you go to your local dealer tell him you want to see and hear the CAT, the high priced synthesizer with the low price. . . . The CAT, now available at a dealer near you.
