

THE BEST OF BOTH WORLDS

The PPG Waveterm System The system of the future

which combines the most valued features of the analog and digital technology.

Start with the Wave 2.2 and gradually add new designs to end up with a complex music computer system.

The Waveterm system consists of the PPG Wave 2.2 keyboard and the PPG Waveterm terminal. The PPG 2.2 is a self-contained digital synthesizer which offers a wider range of sounds than ever before possible with one instrument. With its 2,000 wavetables, the PPG offers over 100 sounds which can be stored in non-volatile memory, and each of its 8 voices can be processed by a resonating 24dB/oct. filter and modulated in real time with the five octave dynamic keyboard. The Wave 2.2 contains an eight-track polyphonic sequencer. Each track may be edited after recording and with the use of the highly sophisticated digital front panel, the sequencer may then be mixed and stored for instant recall.

And all this at affordable prices.
