

SH101

Step out from behind that pile of keyboards and take on the world. There are no strings attached when you're playing the SH-101.

Battery powered, sleek lines, compact design, lightweight (less than most guitars). Strap it on and it becomes a part of you.

Available in Silver, Red or Blue it looks great on stage, and so do you when you're playing it. Plug in a set of phones and let the SH-101 take you where you want to go.

The SH-101 is more than just another pretty face. It's a serious synthesizer — 33 keys, 11-octave range, you can go from deepset rumbling bass to screaming highs in a flash. Modulation Grip in combination with Bender lets you bend a note up, down or sideways.

With the Source Mixer to blend Sawtooth and Square waves (with PWM), full Filtering, Envelope and Interface capabilities, built-in Sequencer, Arpeggiator, you've got more power strapped onto your body than you've ever had sitting in front of you.

Get an SH-101—and Get Moving!

Available at better music stores everywhere. Only \$495.00 retail.
