Technology  
Series

Subject:  
The Concept  
of Programmable  
Performance

**ProForm  
Series**

The new Roland ProForm Series is a group of inter-related products, each providing a specific musical function. Like individual members of a band, each of the ProForm products can sync with others in the series to produce a totally programmable musical performance. The first of the products in the ProForm Series are the TR-606 Drumatix and the TB-303 BassLine.

### TR-606 Drumatix

The Drumatix is a totally programmable drum synthesizer sequencer. The Drum sounds available on the TR-606 include: Bass, Snare, Lo and Hi Toms, Cymbal, Open and Closed Hi Hat. Each sound has its own level control for total mix flexibility.

With the Drumatix, you can program 32 different Rhythm Patterns which can be arranged to play up to 8 complete Rhythm Tracks (songs). After the TR-606 has been programmed, the TR-606 can easily sync to other ProForm products to play the complete drum track of the composition.

### TB-303 BassLine

As the Drumatix is to the drums, the TB-303 is to the Bass, a fully programmable bass synthesizer sequencer. The remarkable features full synthesizer section with dual voice flexibility with dual waveforms and controls for: Tuning, VCF Cutoff, Resonance, Envelope Modulation and Decay. The programmable Accent and Slide functions bring true bass technique capabilities to the TB-303.

With the facility to produce up to 64 different Bass Patterns, the TB-303 BassLine allows you to arrange these into 7 different Bass Tracks, which can then be synced with Drum Tracks you've programmed into the Drumatix. The BassLine also can be easily synced with many other products by the DIN Sync jack or the CV and Gate outputs.

The ProForm Series is bound to appeal to any creative person for writing music, practicing, or simply communicating ideas to other musicians. Each of the products (and there

are more to come), is battery operated with AC adapter capability, totally portable, furnished with a carrying case, and also contains a built-in headphone amplifier which lets you plug in a set of phones and write and practice music anywhere.
