

# The Roland Jupiter-4

## Never Has the Universe Been so Near.

You can make an incredible amount of music on a polyphonic synthesizer. The only problem is that you have to be rolling in money to afford one. Until now. Presenting the Roland Jupiter-4, the first truly polyphonic synthesizer that gives you all the features you need at a price you can live with.

We designed the Jupiter-4 to give you the kind of performance you'd expect from a poly-synth costing twice as much—and then we decided to add some extras. The Jupiter-4 provides four independent voices with instantaneous selection of 19 available programs. The Programmer allows the storage of ALL synthesizer parameters (VCO, VCF, VCA) and, in addition, allows the programming of each program's output volume and LFO vibrato—features our competition somehow forgot.

Where the others leave off is where the Jupiter-4 really begins. We've included a built-in Chorus Ensemble that eliminates the need for detuning banks of oscillators to achieve a fat sound, and our stereo output can span the effect across an entire stage. An incredibly versatile feature is our built-in Arpeggiator which cascades the entire keyboard in any of four patterns. The arpeggio can be controlled either internally or by an external trigger from a digital sequencer or Roland Compu-Rhythm.

The Jupiter-4's spring-loaded Bender is functionally engineered to be the simplest, most effective design possible for adding expression to your music. The Key-Assign mode allows you to select which oscillator bank goes to which key you depress, and if you want, all four oscillators can be played in unison making the JP-4 an unbelievable lead line synth.

If the controls on the synthesizer itself aren't enough for you, we've also included a sustain pedal. AND a rocker pedal that can be used for either volume or VCF control—all of which makes the Jupiter-4 easily the most expressive synthesizer on the market.

But if all of this still isn't enough to make you try out a Jupiter-4, this one fact will be: it costs \$2895.00. Why do the others cost so much more? You'd better ask them that question.

Roland Corp U.S.A., 2401 Sanybrook Ave., Los Angeles, CA, 90040 (213) 685-5141. Enclose \$1 for a copy of our latest keyboard catalog.
