

## If it's in your head, it's in the D-70.

As scientists see it, 90 percent of your brain's creative potential is untapped. Which, as we see it, isn't so much a reflection on your brain as it is on not having the right tool to do the tapping—a tool that now exists in the extraordinary new D-70 Super L/A Synthesizer from Roland.

The D-70 provides a radically new level of creative flexibility. Thanks to our new Differential Loop Modulation technology, there are thousands of new distinctive, modulated waveforms

and a slew of new PCM samples to work with. And since the D-70 layers up to four multi-samples at once, it's not only easier to create new sounds the moment you conceive them, it's also possible to produce some of the brightest, fattest sounds imaginable.

The D-70 also delivers tremendous hands-on creative control, courtesy of a Tone Palette editing system which gives instant access to the most widely-used synthesizer parameters. And since you can use the four sliders to modify any of four

Tones simultaneously in real time, you can create new sounds instantly.

We realize this is a lot for 10 percent of your brain to take in. So if you have questions, call (213) 685-5141. And if you want to skip the call and just buy one, **Roland**® that's ok with us, too.
