MC-500 MkII MICRO COMPOSER

For a Better MIDI Environment

MC-500 Mk II. A powerful, self-contained MIDI production computer whose open-system design and **Super MRC** software let you develop your MIDI environment exactly the way you want it. Now and in the future.

MC-500 Mk II with **Super MRC** is a formidable partnership. 100,000-note capacity with extensive edit facilities including Microscope Mode. 8-song memory over eight tracks plus dedicated rhythm and tempo tracks. 2 independent MIDI Outs for full control over 32 separate channels.

Super MRC is also compatible with the **MC-500 Mk I** and **MC-300**. And song data already created on these units can easily be converted for use with **Super MRC**.
