

- 6-voice polyphonic synthesizer (two oscillators per voice) using the same stable oscillators and accurate computer tuning as the Prophet-5, the industry standard
- 100 programs which can be modified or replaced by your own sounds
- New filter circuit which delivers exceptionally full tone colors while maintaining the classic Prophet sound
- Real-time, non-volatile polyphonic sequencer
- Dual-mode arpeggiator: up/down or assignable
- Chord tracking
- Cassette interface
- Computer interface — MIDI (Musical Instrument Digital Interface)

We think you'll agree that the New Prophet is one hell of an instrument. Compare it to **any** polyphonic synthesizer on the market. Based on Sequential Circuits' years of successful innovation, the PROPHET-600 is the only instrument available that offers the professional features and bold sound of a Prophet for \$1995. Experience counts.

Sequential Circuits, in conjunction with several other manufacturers, has pioneered the development of an easy-to-use system for interfacing synthesizers with one another and with home computers. The MIDI-equipped PROPHET-600 can be connected with one cable to any other MIDI-equipped instrument. For example, when two PROPHET-600's are interfaced, either keyboard can control both synthesizers, allowing four oscillators per voice and two different programs sounding simultaneously! The MIDI is also compatible with home computers for program storage, patch print-out, music notation, sequencing, and multi-keyboard orchestration.
