

When an innovative new technology produces great sound and still passes Sequential's tough requirements for quality and ease-of-use, what's the result? A New Prophet.

Introducing the radically different Prophet VS, an eight voice synthesizer that produces a wave of sound so big we almost named it Tsunami.

It's a standout performance instrument based on a new digital technology called Vector Synthesis. It's easy to program, it's made in America by Sequential, and it offers the full range of features and commitment to quality that is expected in a Prophet.

What is Vector Synthesis?

Briefly, complex sound waveforms are stored digitally (with a minimum of 128 waveforms—including white noise—always available). A sophisticated algorithm is employed to dynamically mix up to four of these stored waveforms together to create sounds. Both subtle, and powerful changes in timbre are easily accomplished—even during a live performance—using the joystick.

New waveforms can also be easily constructed and modified by the user via the joystick. These features are unique to the VS.

Made for Performance!

The Prophet VS offers more immediate control over changes in timbre than any synth ever designed. The ability to control and modulate stereo panning, voice oscillator mixing, and stereo chorusing in real-time, as well as instant access to 200 programs via ROM and RAM cartridges are just a few of the features making the Prophet VS a necessary instrument for performing artists. Additional features include a velocity and pressure sensitive 5-octave keyboard with programmable split, and the most versatile arpeggiator available to date—offering new options like polyphonic voicing, rests, and layering.

MIDI? The PROPHET VS MIDI implementation is matched only by the PROPHET 2000.

SEQUENTIAL

The Prophet VS can be heard at your Authorized Sequential Dealer.

Sequential
3051 North First Street
San Jose CA 95134

Sequential/Europe
PO Box 16, 3640 AA Mijdercht
The Netherlands
