How to build a complete keyboard studio for under $1500.

The Keyboard
SIEL DK-80

The DK-80 is a dynamic, bi-timbric synthesizer that offers features previously found only on keyboards with significantly higher price points. Included among its unique sonic characteristics are a Real Time, Two Track Sequencer with up to 300 note memory; the ability to split the keyboard to create two six-voice, touch sensitive synths each with their own independent controls; stereo effects and spatiality; full interfacing thru MIDI; 50 internal Pre-Sets (10 of which are programmable) with additional voice capabilities through external ROM & RAM cartridges; programmable multi-function foot pedal.
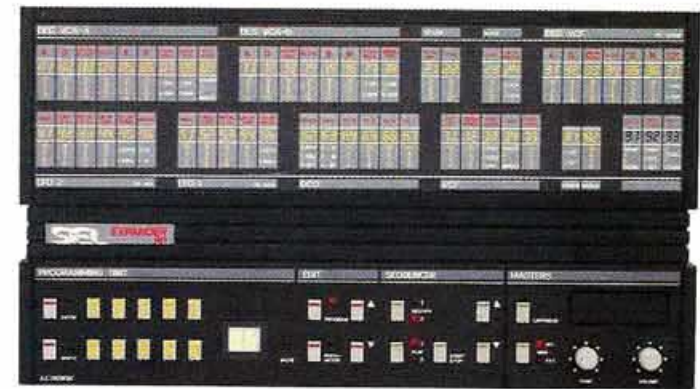

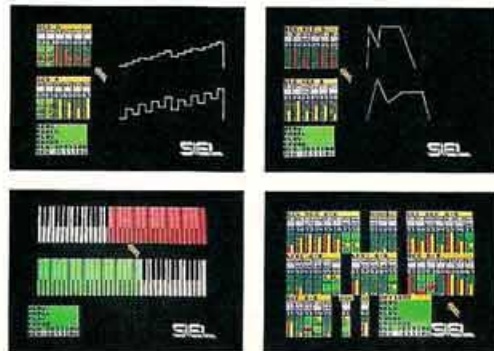

The DK-80. At only $995, it's easily the most affordably complete synthesizer on the market today.

The Expander
SIEL EXPANDER 80

The Expander 80 is like getting a second DK-80 without the keys. It's onboard functions duplicate those of our synthesizer, allowing any keyboard its used with to enjoy the sonic versatility of the DK-80. Among these features are a Real Time, Two Track Sequencer; 8 voices, usable in single or split (4 + 4) mode with independent controls; 50 internal Pre-Sets with ROM & RAM external cartridge expansion; programmable multi-function pedal.

The Expander 80 can be used with any keyboard that is MIDI compatible. At only $495, you'll see how easy it is to expand your sound without shrinking your pocketbook.

The Software
SIEL SOFTWARE DIVISION

Siel is very different from many synthesizer manufacturers in that we actually write our own software. There are several programs now available for use with a Commodore 64 and your Siel keyboard studio. Among these are the DK-80 Graphics Editor for detailed programming of your keyboard, our Sequencer Program providing control of up to 16 instruments thru MIDI, plus real time recording and storage, and our Data Base Management that collects, groups and shuffles up to 250 voices.

Siel Software. Proof that we take our technology very seriously.

The Studio

As technological insights have allowed us to create a keyboard system as complete as the one shown here, so do space limitations prevent us from listing all the sonic advantages of playing it. We urge you to visit your Siel dealer (you can find out who that is by calling us at 516-775-5510) for a hands on demonstration. You may also obtain further information by using the order coupon at right.

The Keyboard. The Expander. The Software. Together or separately, never before has so much sound cost so little.
