

**Expandable...  
Programmable...  
Unbelievable!**

Discover the sophisticated sounds of SIEL electronic keyboards and accessories:

#### **DK600 Synthesizer**

Broaden your scope of musical innovation at an amazingly affordable price. This six voice, touch-sensitive MIDI-compatible synthesizer features 95 pre-set voicing programs...instant edit control...computer compatibility...programmable keyboard split...and digitally controlled oscillators for the ultimate in pitch stability and rich fundamentals.

#### **EXP600 Expander**

Expand your voicing capability without the expense of adding another keyboard. Up to 16 EX600 modules interface with the DK600 or any other synthesizer that "talks" MIDI. The result: 95 more voicing programs per module and the layered sound of multiple six-voice polyphonic synthesizers that has to be heard to be believed!

#### **MIDI Computer Interface**

The SIEL MCI translates instrument signals into computer language and works with any MIDI-compatible synthesizer. In this way, you can use the memory of your personal computer to store and replay a vast array of note or chord sequences...and interface with up to 3 MIDI instruments, including your drum machine.

SIEL offers a full line of electronic keyboard products, also including our PX Electric Piano...featuring 73 notes, 10 pre-set voices and touch sensitivity; the PXjr Electric Piano...an inexpensive touch-sensitive piano with built-in amplification; and the OR400 Synthesizer...spotlighting strings, brass, piano and organ with synthesizer and effects features.
