

The Complete Lead.

Syrnix is a monophonic synthesizer, designed for the demanding keyboardist/synthesist as a lead instrument, and as an indispensable completion in a poly-keyboard set-up.

Its new filter design features a combination of a 24 dB/octave VC Low Pass Filter, and two independent Resonant VC Peak Filters for precise and dynamic sound shaping, ranging from rock-solid bass sounds to articulated formant effects.

Other novel features of Syrnix are Multi-Mode Sync, and Sync D-Tune, new ways to create subtle timbre shades.

The unique multi-routable Touch 'N Bend Control makes Syrnix a sensitive instrument which listens and responds to its player.

The uncompromised completeness and flexible routing make Syrnix a versatile machine for dramatic sound effects.

Syrnix starts where other synths do not go far enough.

Syrnix is The Complete Lead, indeed.

Key Specs:

3½ Octave Keyboard □ 2 VCO's □ Multi-Mode Sync & Sync D-Tune □ 1 Sub-Oscillator □ 3VCF's □ 2 ADSR's □
2 LFO's with Reset & Shaper Modes □ Auto-Portamento □ Multiple Triggering □ Touch 'N Bend Pad □ Bend Assign □
Ring Modulator □ Noise Generator □ CV Inverters □ Audio Mixer □ Keyboard CV & Gate Inputs/Outputs □
Signal Output & Headphone Driver.
