

Don't miss a beat.

Was the only sour note in your vacation having to leave your keyboard at home?

Then the Yamaha PS-10 and PS-20 will be music to your ears. They're portable keyboards. Complete with features not even found on some stay-at-home pianos and organs.

There's a choice of orchestral voices. Automatic rhythm. Even single-finger chording. But only when you want it.

In fact, Yamaha

built PASS technology into every PS-10 and

PS-20—the same technology that's made the Yamaha Electone organ the best selling organ in the world.

And when you're not

traveling, you can hook your PS-10 or PS-20 into your home organ. It's like adding an extra keyboard.

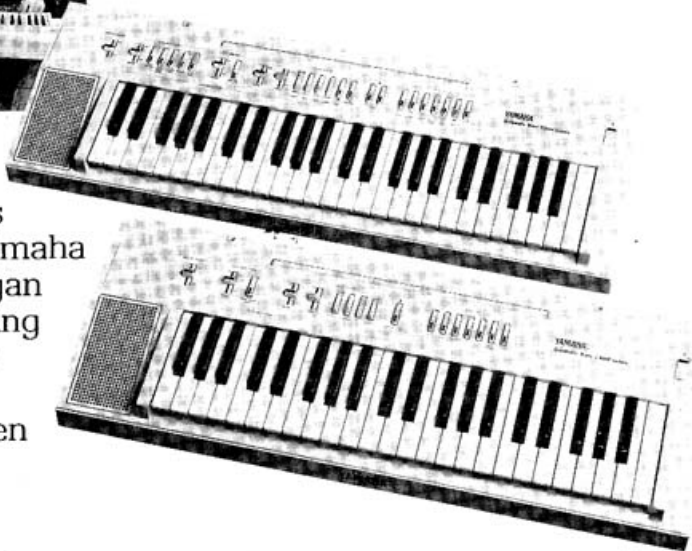

Take a trip to your Yamaha dealer today..So

tomorrow, when you travel, you can take along an extra keyboard—a Yamaha PS-10 or PS-20. You'll never miss a beat.

For more information see your local Yamaha dealer or write: Keyboard

Division, Yamaha International Corporation, Box 6600, Buena Park, CA 90622.
